INTRODUCTORY NOTE

In collaboration with the Member States, the European Commission has established the “EXCISE DUTY TABLES” showing rates in force in the Member States of the European Union .

As from 1 January 2007 this publication:

- * covers the 27 Member States of the EU;*
- * has been divided into three different sections:*

- I** *Alcoholic Beverages*
- II** *Energy products and Electricity*
- III** *Manufactured Tobacco.*

Further to the approval during the Committee on Excise duties of 12 & 13 May 2009, new tables are inserted, as from 1 July 2009, with reduced rates applied by MS in specific sectors on Gas oil, Kerosene, Heavy fuel oil, LPG, Natural Gas, Coal & Coke and Electricity.

This publication aims to provide up-to-date information on Member States main excise duty rates as they apply to typical products. The information is supplied by the respective Member States. The Commission cannot be held responsible for its accuracy or completeness, neither does its publication imply and endorsement by the Commission of those Member States' legal provisions.

It is intended that Member States will regularly communicate to the Commission all modifications of the rates covered by this publication and that revised editions of the tables will be published twice a year.

*To this end, it is vital that all changes to duty structures or rates are advised by Member States to the Commission as soon as possible so that they may be incorporated in the tables with the least possible delay. All details should be sent to Mrs Maria Makropoulou:
e-mailMaria.Makropoulou@ec.europa.eu
telephone.....Int-32-2-295.83.70.*

This document together with general information about the Taxation and Customs Union can be found at:

http://ec.europa.eu/taxation_customs/index_en.htm#

For further or more detailed information, please contact directly the Member States concerned (see list of contact persons at the end of this document).

IMPORTANT REMARK

*Concerning transitional arrangements
for the "New member States"
of the European Union*

Council Directive 2003/96/EC – Energy taxation Directive

The energy taxation Directive (2003/96/EC – "energy Directive") was adopted in 2003 and defines the fiscal structures and the levels of taxation to be imposed on energy products and electricity. It replaces, with effect from 1 January 2004, Council Directive 92/81/EEC (on the harmonisation of the structures of excise duties on mineral oils) and Council Directive 92/82/EEC (on the approximation of the rates of excise duties on mineral oils).

The energy Directive is in compliance with Community commitments to integrate environmental concerns into the energy taxation area and will improve the functioning of the Internal Market.

*The 2003 Treaty of Accession¹ provided for transitional arrangements and specific measures for two new Member States². **In addition, two additional Council Directives for specific arrangements were adopted on 29 April 2004 (Directive 2004/74/EC³ and Directive 2004/75/EC⁴).***

*Directive 2004/74/EC amends the energy Directive as regards the possibility **for the Czech Republic, Estonia, Latvia, Lithuania, Hungary, Malta, Poland, Slovenia and Slovakia** to apply temporary exemptions or reductions in the levels of taxation.*

*Directive 2004/75/EC amends the energy Directive as regards the possibility **for Cyprus** to apply temporary exemptions or reductions in the levels of taxation.*

¹ OJ L 236, 23.9.2003, p. 17.

² Cyprus and Poland.

³ OJ L 157, 30.4.2004, p. 87.

⁴ OJ L 157, 30.4.2004, p. 100.

- BE : S* (= sulphur or aromatic level).
<98 oct bio = Biofuel: tariff to be used for petrol, mixed with a fixed percentage of bio-ethanol produced by authorized production units (570,6202 EUR).
- BG Leaded petrol is forbidden for sale in Bulgaria.
Unleaded petrol: transitional period granted for unleaded petrol – see Accession Treaty.
Unleaded petrol: reduced rates for petrol when *ethanol* with 4% to 5% of volume has been added (BGN 664 – EUR 339,50). effective as of 24.11.2009 until 23.11.2011
- CZ: Leaded petrol is no longer sold.
- DK: Leaded and unleaded petrol - equipment making it possible to recover the vapour. Includes CO₂ tax.
- DE: *Sulphur content.
- EL: * Excise duty rates valid as of 3 May 2010. VAT rate valid as of 1st July 2010.
- ES: Zero rate at present (but only until 31/12/2012 the latest) for biodiesel (Article 16 of Directive 2003/96/EC).
- ES: VAT rate valid as of 1st July 2010.
- FR: *A rate is determined for each region ranging from 589,20 up to 606,90 euros (in 2008).
- *IE Includes a CO₂ charge of 34,38 EUR per 1000 litres.
- IE No CO₂ charge applies to biofuel or to the biofuel proportion of a blend.
- IE Until the end of 2010 there is full relief for biofuel in approved projects.

*** 442,00 with a minimum biofuel content of 46 l and sulphur content <=10 mg/kg, otherwise 475,00.

PL: *Leaded petrol is not in on the market

PL: **See Council Directive 2004/74/EC.

PL: Includes fuel tax

PL: Exemption from excise duty for bio-components intended for production of blended fuels, which meet quality requirements; Reduced rate for petrol containing bio-components on the level 0,37 EUR per each litre of bio-components added to that petrol which meet quality requirements; reduced rate for bio-components used as pure biofuels which meet quality requirements on the level of 2,35 EUR / 1000 l.

PL: *** CN 2710 1131 total exemption from excise duty

PT: VAT rate valid as of 1st July 2010.

RO: *The energy products used as motor fuel are exempted from the payment of excise duties when they are produced in totality from biomass. When the energy products used as motor fuel contain minimum 4% in volume products obtained from biomass, a reduced rate of excise duty is applied.

RO: VAT rate valid as of 1st July 2010.

*SI: Shows the situation as on 1st July 2010. Leaded petrol is forbidden for sale in Slovenia.

Excise duty on bio fuels is 0 €. For energy products to which bio fuels has been added or products falling within the specified CN codes, the beneficiary shall have the right to the refund of paid excise duty or to the exemption from payment of the excise duty in proportion to the share of the added product, however not more than 5%. Bio fuel that can be added up in unleaded petrol is bioethanol (ethyle alcohol C2H5OH) falling within CN code 2207 1000- undenaturated, of concentration of 80% vol. or higher; falling within CN code 2207 2000-denaturated, of any concentration.

FI: Includes CO₂-tax and strategic stockpile fee. For other than low sulphur product, the rate is EUR 653,50. * Leaded petrol is no longer sold in Finland.

FI: VAT rate valid as of 1st July 2010.

SE: Includes CO₂-tax.

SE: *Petrol Class **1a** is an alkylate based petrol for two-stroke engines.

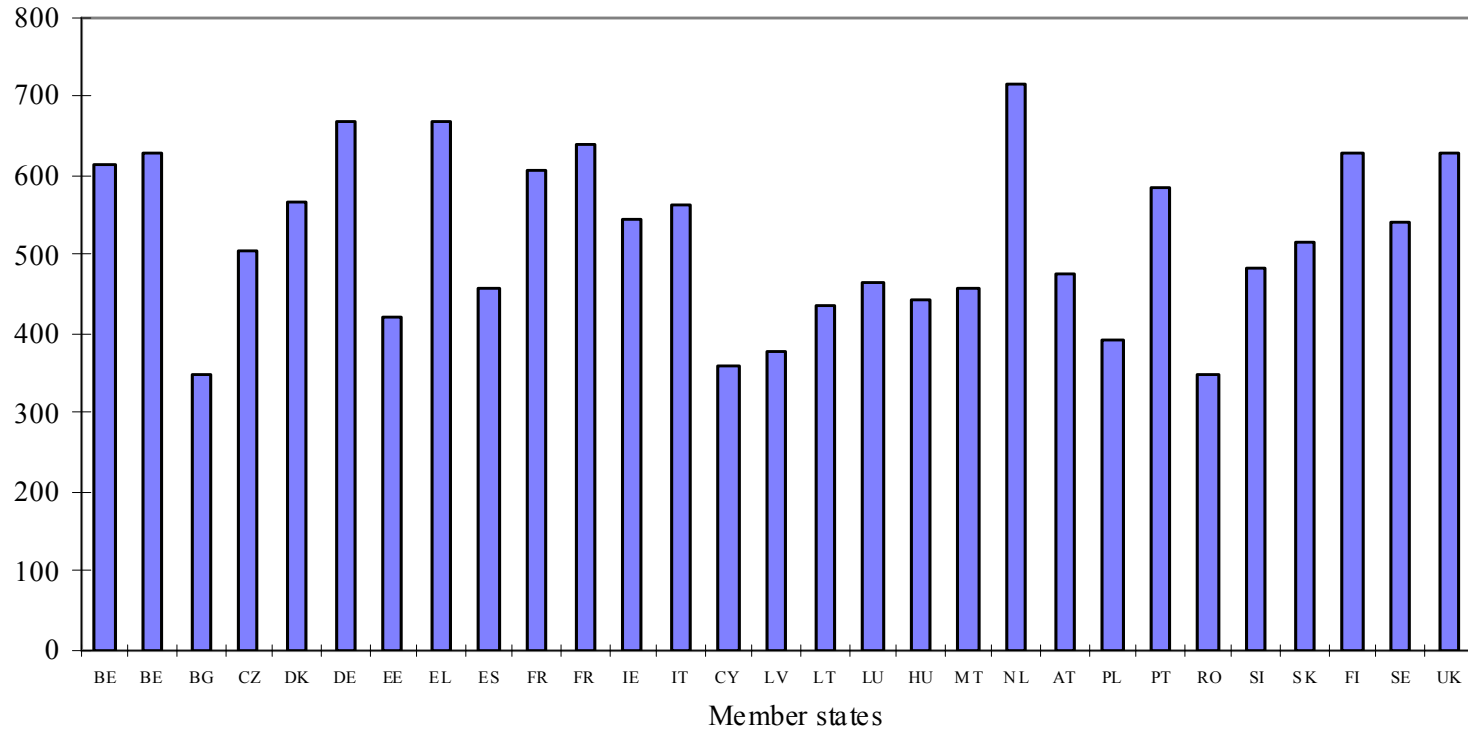

▼ **IMPORTANT AND GENERAL REMARK** ▼ → For further and complete details concerning the transitional periods and derogations from excise duty for each country and energy product, go through these links to consult the Council Directives 2003/96/EC, 2004/74/EC and 2004/75/EC ([links](#) → [go to page 3](#)).

- CZ: As from 2009 operators who release petrol for consumption have to ensure that the released quantity of petrol contains 3,5 % of biofuel on the annual basis . On the low percentage blends of biofuels any excise duty exemption is granted. In the case of bioethanol comprising of not less than 70 % and not more than 85 % of the denatured ethyl alcohol reimbursement of excise duty is granted at the level of the ethyl alcohol proportion in the mineral oil. High percentage blends with ethyl alcohol produced from biomass and 2nd generation biofuels are exempted from excise duty within pilot projects for technological development if intended for use as propellant.
- FR: Taxis: reduced rate: refund of the difference between the regional rate and the reduced rate (35,90 €/ 1000 l)
 FR: Since 2005, operators who release motor fuels (i.e., premium-grade petrol, automotive diesel fuel, bioethanol) for consumption are held to meet specific biofuel admixture requirements defined by law, failing which they are liable to an additional tax.
 The admixture proportion, expressed in terms of energy content, required to earn exemption from the tax rises each year. (2010 : 7%). The tax rate decreases in proportion to the volume of biofuels that operators blend into the motor fuels released for consumption.
- IE: Substitute fuels, including biofuel, used as auto-fuel in substitute for petrol are taxed at the petrol rate.
 Fuel substitutes: Full (qualified and conditional) relief for Bioethanol used in approved projects – effective from November 2006.
- LT: The excise duty exemption shall apply to petrol with substances of biological origin in such cases:
 -when the percentage of biological origin substances is not less than 30 percentage, the excise duty rate is reduced by the percentage in proportion to the percentage of additives of biological origin in the product;
 - when the percentage of biological origin substances is less than 30 percentage, the excise duty rate is reduced by the percentage in proportion to the percentage of additives of biological origin in the product and only for the part that exceeds the compulsory blending of additives of biological origin .
- UK: VAT rate of 17,50% - non domestic use. Domestic use for deliveries of less than 2300 litres - VAT rate of 5%, except biofuels which are rated 17,50%.

BG: Gas oil used as propellant: transitional period granted for gas oil used as propellant – see Accession Treaty.

*Biodiesel - zero rate for biodiesel, falling within CN codes 3824 90 99 effective as of 24.11.2009 until 23.11.2011.

Gas oil used as propellant: Reduced rate for gas oil when *biodiesel* with 4% to 5% of volume has been added – BGN 582 (EUR 297,58) effective as of 24.11.2009 until 23.11.2011.

** marked gas oil in accordance with Council Directive 95/60/EC and Commission Decision 2001/574/EC.

CZ: * diesel blend comprising of not less than 30 % of rapeseed oil methyl ester of the total weight: reduced rate as of 7665 CZK/1000 litres until 30 June 2015.

** marked gas oil in accordance with Council Directive 95/60/EC and Commission Decision 2001/574/EC: reimbursement of excise duty of 404,80 EUR per 1000 litres when it has been duly proved that the gas oil has been used for heating purposes.

DK: Includes CO₂ tax.

EL: Gas oil heating – a winter period has been defined in Greece (from 15 October to 30 April) during which a reduced rate of 21 EUR per 1000 lt is applied. The normal rate of duty is 412 EUR per 1000 lt. A refund of excise duty is applied which amounts to 412 - 21 euros per 1000 lt. Biodiesel is taxed like motor gas oil : 412,00 € per 1000 lt.

Excise duty rates valid as of 3 May 2010. VAT rate valid as of 1st July 2010.

EL: *Gas oil industrial use – a refund of duty (EUR 125 per 1000 litres) is given to industries that use gas oil in their production activities, after a fiscal control.

ES: *Zero rate at present (but only until 31/12/2012 the latest) for biodiesel (Art. 16 of Council Directive 2003/96/EC).

ES: VAT rate valid as of 1st July 2010.

FR: *A rate is determined for each region ranging from 428,40 up to 416,90 EUR (in 2008)

IE *Includes CO₂ charge of 39,98 EUR per 1000 litres. ** Includes CO₂ charge of 41,30 EUR per 1000 litres.

IE No CO₂ charge applies to biofuel or to the biofuel proportion of a blend.

IE Until the end of 2010 there is full relief for biofuel in approved projects.

CY: *as from 17/6/2010.

** A reduced rate of duty (EUR 124,73 per 1000 litres) is applied on gas oil used as motor fuel in stationary motors.

LV: *Gas oil propellant: Reduced rate for gas oil when *biofuel (rapeseed oil)* has been added – fuel with 5% to 30% biofuel = LVL 223 (EUR 314,84); fuel with minimum 30% biofuel = LVL 164 (EUR 231,54) and fuel that is completely made up from rape seed oil = LVL 0.

**If the biofuel at least 5% has been added.

LT *See article 1 of Directive 2004/74/EC.

LU: See Council Directive 2003/96/EC.

LU: *included climate changing tax of EUR 25 per 1000 litres (since 1.1.2008)

LU: **Gas oil heating – (RDC = *Redevance de contrôle*) - a monitoring charge of EUR 10 per 1000 litres (Article 9.2 of Directive 2003/96/EC) – see *additional comments* below.

MT: ^(m)Maritime commercial activities (harbour cruises, tugging activities, bunkering operations, inland navigation between Malta and Gozo by vessels of a tonnage of less than 3,500 Tons, dredging operations, conveyance of goods and passengers between shore and ocean going vessels and sea-farming activities and navigation for commercial purposes within Maltese Territorial Waters).

MT: ^(f)Fishing purposes as laid down by the Ministry of Agriculture and Fisheries., and when supplied to foreign based private pleasure sea craft for outbound voyages , and electric power generation.

To exercise sufficient control and to avoid fraudulent practices when supplied to locally based private pleasure sea craft for outbound voyages excise duty/Vat is paid in full and partial refund is given when sufficient proof is given that such sea craft have touched a foreign land.

MT: Gas Oil supplied with partial or full duty exemption is fiscally marked in accordance with Council Directive 95/60/EC and Commission Decision 2001/574/EC.

MT: *See Council Directive 2004/74/EC.

NL : *Sulphur content (mg/kg).

AT *a) - with a minimum biofuel content of 66 l and sulphur content <=10 mg/kg, *b) – otherwise;

From 1 July 2008: **a) marked gas oil with sulphur content <=10 mg/kg; **b) marked gas oil with sulphur content > 10 mg/kg.

refund of duty for gas oil used for agricultural purposes, refund of duty for gas oil used for the carriage of goods and passengers by rail and refund of duty for gas oil used in combined heat and power generation (difference between standard tax rate and reduced rate for marked gas oil)

PL: Propellant – includes fuel tax.

PL: *See Council Directive 2004/74/EC.

PL: Exemption from excise duty for bio-components intended for production of blended fuels, which meet quality requirements; reduced rate for gas oil containing bio-components on the level 0,25 EUR per each litre of bio-components added to that gas oil, which meet quality requirements; for bio-components used as pure biofuels which meet quality requirements on the level of 2,36 EUR/ 1000 l.

PT: Since 1/1/2003 agricultural gas oil has it's own tax rate.

PT: Reimbursement of EUR 280,00 per 1000 litres of excise duty levied on biodiesel substitute of Road Diesel.

PT: VAT rates valid as of 1st July 2010.

RO: *The energy products used as motor fuel are exempted from the payment of excise duties when they are produced in totality from biomass. When the energy products used as motor fuel contain minimum 4% in volume products obtained from biomass, a reduced excise duty is applied.

**The energy products used as heating fuel are exempted from the payment of excise duties when they are produced in totality from biomass. When the energy products used as heating fuel contain minimum 4% in volume products obtained from biomass, a reduced excise duty is applied.

RO: VAT rate valid as of 1st July 2010.

*SI: Shows the situation as on 1st July 2010. For gas oil for heating purposes the situation includes CO₂-tax in the amount of 32,50 € per 1000 litres.

Excise duty on bio fuels is 0 €. For energy products to which bio fuels has been added or products falling within the specified CN codes, the beneficiary shall have the right to the refund of paid excise duty or to the exemption from payment of the excise duty in proportion to the share of the added product, however not more than 5%. Bio fuel that can be added up in auto motive gas oil is biodiesel falling within CN code 3824 9091.

SK: The Slovak legislation doesn't distinguish the tax rate for commercial use and non commercial use.

SK: Gas oil ind./comm.: fiscal marked gas oil in accordance with Council Directive 95/60/EC and Commission Decision 2001/574/EC.

SK: *rate valid as of 1st February 2010 (up to 31/1/2010 : 481,31 € per 1000l).

FI: Includes CO₂-tax and strategic stockpile fee.

FI: Biofuel for purposes set out in Articles 8 and 9 in Council Directive 2003/96/EC is exempt.

FI: VAT rate valid as of 1st July 2010.

SE: Includes CO₂-tax.

SE: Environmental classes.

SE: *Gas oil used in stationary motors by industry in the manufacturing process. A general, higher, tax rate of SEK 3804,00 (EUR 373,34) per m³ applies to gas oil used in stationary motors used by other commercial enterprises as well as to gas oil used for other purposes listed in Article 8.2.

SE: **For taxation of gas oil for heating purposes in the manufacturing process in industry outside the Emission Trading Scheme as well as agriculture, horticulture, pisciculture, forestry. For the manufacturing process in industry within the Emission Trading Scheme, the tax rate amount to SEK 451,95 (EUR 44,36) per m³. Gas oil used for heating purposes by other consumers in the business sector amount to the same rates as apply to non-business use.

SE: The sulphur tax on peat, coal, petroleum coke and other solid or gaseous products is set at SEK 30 (EUR 2,94) per kg of sulphur in the fuel. The sulphur tax on liquid fuels – such as diesel oils, heating gas oils and heavy fuel oils is SEK 27 (EUR 2,65) per m3 of oil for each tenth of a per cent by weight of the sulphur content. However, oil products with a sulphur content of a maximum of 0,05 per cent by weight is exempted from tax. Since all motor fuels have a sulphur content below 0,05 per cent the sulphur tax on motor fuels is zero. When measures are taken to reduce emissions the tax can be repaid by SEK 30 (EUR 2,94) per kg of reduced emission.

UK: * Marked gas oil rate: GBP 109,90 (EUR 120,67).

** If industrial /commercial use **relates to tied oils**, the **rate is NIL**.

UK: VAT rate of 17,50% - non domestic use. Domestic use for deliveries of less than 2300 litres – VAT rate of 5%.

CZ: *reimbursement of 60 % of excise duty levied on diesel and diesel blend up to 5 % of FAME and 85 % of excise duty levied on diesel blend comprising of not less than 30 % of rapeseed oil methyl ester of the total weight.

DK: **Only CO2-tax.**

* CO2-tax is reduced to 13/18 due to considerations of energy intensive process.

EE: Estonia applies a common reduced excise rate when gas oils are used for:

- agricultural purposes;
- fixed engines;
- heating and the production of heat or electric power;
- machinery or motor vehicles which are prohibited to use on public roads and which are used in mining, forestry or construction work;
- railways;
- shipping traffic, including in commercial fishing, except in non-commercial recreational shipping.

EL: *The normal rate is 412 euros (valid as of 3 May 2010). A refund of excise duty is applied which amounts to 412 - 21 euros per 1000 lt.

EL: VAT rate valid as of 1st July 2010.

ES: *A reimbursement has been established for gas oil used for agricultural purposes (Art. 15.3 of Council Dir. 2003/96/EC)

** An exemption applies to fuels used in railways (Art. 15.1.e) of Council Dir. 2003/96/EC).

ES: Zero rate at present (but only until 31/12/2012 the latest) for biodiesel (Art. 16 of Council Dir. 2003/96/EC).

ES: VAT rate valid as of 1st July 2010.

RO: VAT rate valid as of 1st July 2010.

*SI: The situation shows the minimum excise duty adopted by the Council (Dir. 2003/96/EC), as on 1st July 2010, in Slovenia minimum level of possible refund for gas oil used as propellant for Commercial diesel according to this provision.

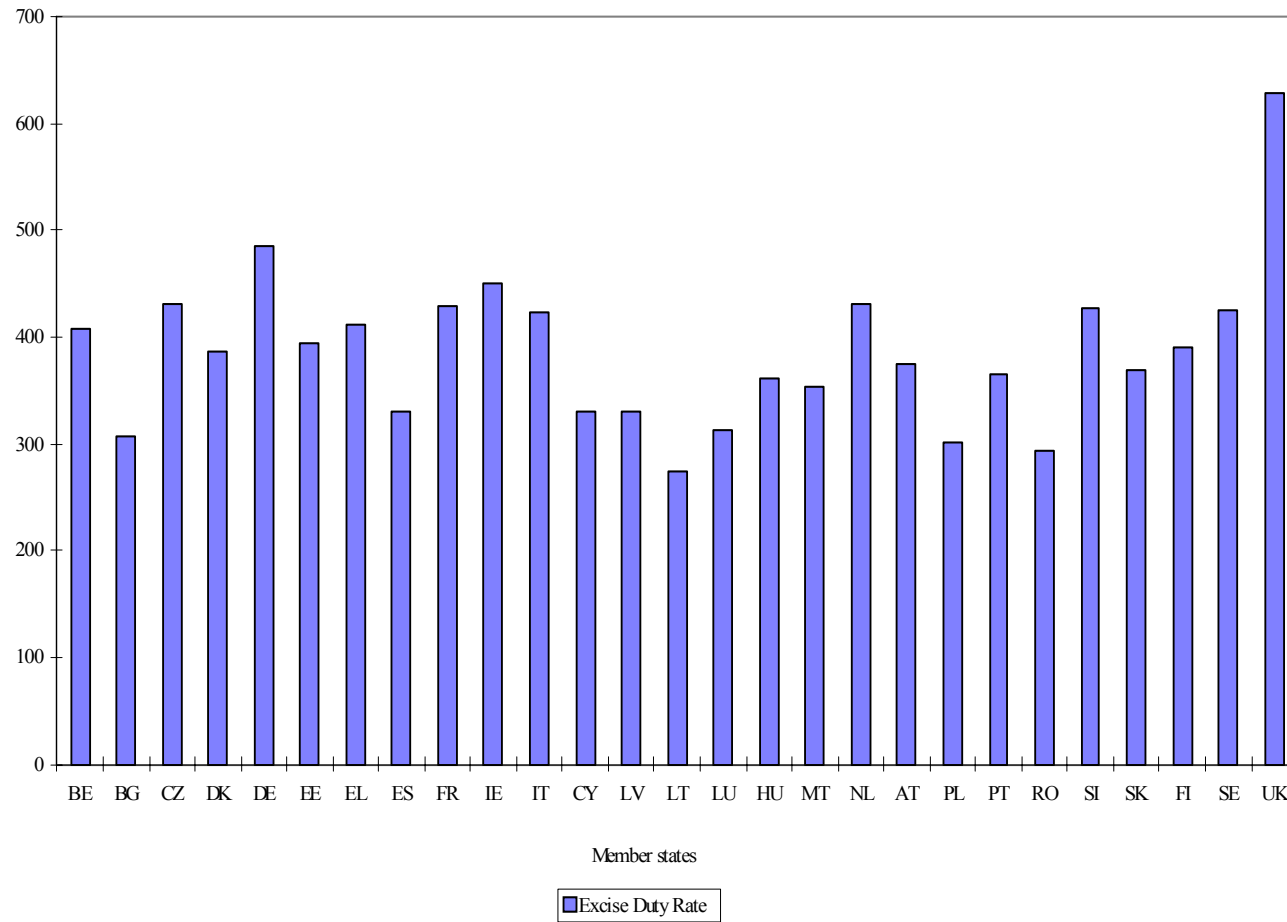

▼ **IMPORTANT AND GENERAL REMARK** ▼ → For further and complete details concerning the transitional periods and derogations from excise duty for each country and energy product, go through these links to consult the Council Directives 2003/96/EC, 2004/74/EC and 2004/75/EC ([links](#) → [go to page 3](#)).

- BE: ≤ 10 mg/kg* norm: the normal tariff
 ≤ 10 mg/kg* bio: tariff to be used for gas oil, mixed with a fixed percentage of FAME, produced by authorized production units 373,2500 EUR).
- BE: Gas oil industrial/commercial use (articles 8, 11 and 17 of Directive 2003/96/EC):
 An *energy-intensive* business with an environmental objectives agreement or arrangement: excise duty EUR 0 (all gas oils).
 A business with an environmental objectives agreement or arrangement: excise duty EUR 10,5 (all gas oils).
- BE: Gas oil heating – business use (articles 11 and 17 of Directive 2003/96/EC):
 An *energy-intensive* business with an environmental objectives agreement or arrangement: excise duty EUR 0 (all gas oils).
 A business with an environmental objectives agreement or arrangement: excise duty EUR 9,2427 (> 10 mg/kg) or 8,5511 (≤ 10 mg/kg).
- CZ: As from 2009 operators who release gas oil for consumption have to ensure that the released quantity of gas oil contains 4,5 % of biofuel on the annual basis .In the case of the low percentage blends of biofuels any excise duty exemption is granted. There are exemptions in force on FAME under CN code 3824 9099, PVO under 1507 and 1518 intended for use as motor fuel and liquified biogas under CN code 2711 19 intended for use as motor fuel. Exemption is also granted on 2nd generation biofuels intended for use as motor fuel in the field of pilot projects for technological development.
- DK: Denmark has four categories of gas oil used as propellant: “normal”, “light”, “low sulphur” and “sulphur free”. The “low sulphur” gas oil is a new quality with max. 50 ppm sulphur while sulphur free contains max. 10 ppm sulphur. The total tax consists of a *mineral oils tax* and a *CO₂-tax*.
- FR/IT: National measures concerning diesel (Gas Oil “propellant”) used by commercial vehicles exist in FR (refund of the difference between the regional rate and the reduced rate (39,19 €/ 1000 l) and IT.
 FR: Taxis: reduced rate: refund of the difference between the regional rate and the reduced rate (30,20 €/ 1000 l)
 FR: Since 2005, operators who release motor fuels (i.e., premium-grade petrol, automotive diesel fuel, bioethanol) for consumption are held to meet specific biofuel admixture requirements defined by law, failing which they are liable to an additional tax.
 The admixture proportion, expressed in terms of energy content, required to earn exemption from the tax rises each year. (2010: 7%). The tax rate decreases in proportion to the volume of biofuels that operators blend into the motor fuels released for consumption.
- FR: In 2009, reduced rate when used for agriculture purpose from January 1st to December 31. refund of 5 €/hl
- IE: Substitute fuels, including biofuel, used as auto-fuel in substitute for diesel are taxed at the diesel rate.
 IE: Fuel substitutes: Full (qualified and conditional) relief for Biodiesel and Pure Plant Oil used in approved projects – effective from November 2006.
- CY: Full relief from excise duty, effective from 19/10/2007, on biofuel used for transport. In the case of biofuels blended in mineral oil derivatives, excise duty is charged at reduced rate depending on the percentage by volume of the contained biofuels in the said products.
- LT: The excise duty exemption shall apply to gas oil with substances of biological origin in such cases:
 -when the percentage of biological origin substances is not less than 30 percentage, the excise duty rate is reduced by the percentage in proportion to the percentage of additives of biological origin in the product;
 - when the percentage of biological origin substances is less than 30 percentage, the excise duty rate is reduced by the percentage in proportion to the percentage of additives of biological origin in the product and only for the part that exceeds the compulsory blending of additives of biological origin .
- LU: Monitoring charge (RDC): Member States which on 1 January 2003 were authorised to apply a monitoring charge for heating gas oil, may continue to apply a reduced of EUR 10 per 1000 litres for that product (Article 9.2 of Directive 2003/96/EC).

Gas Oil
(propellant)

Situation as at 1 July 2010

Values in EUR at 1/10/2009

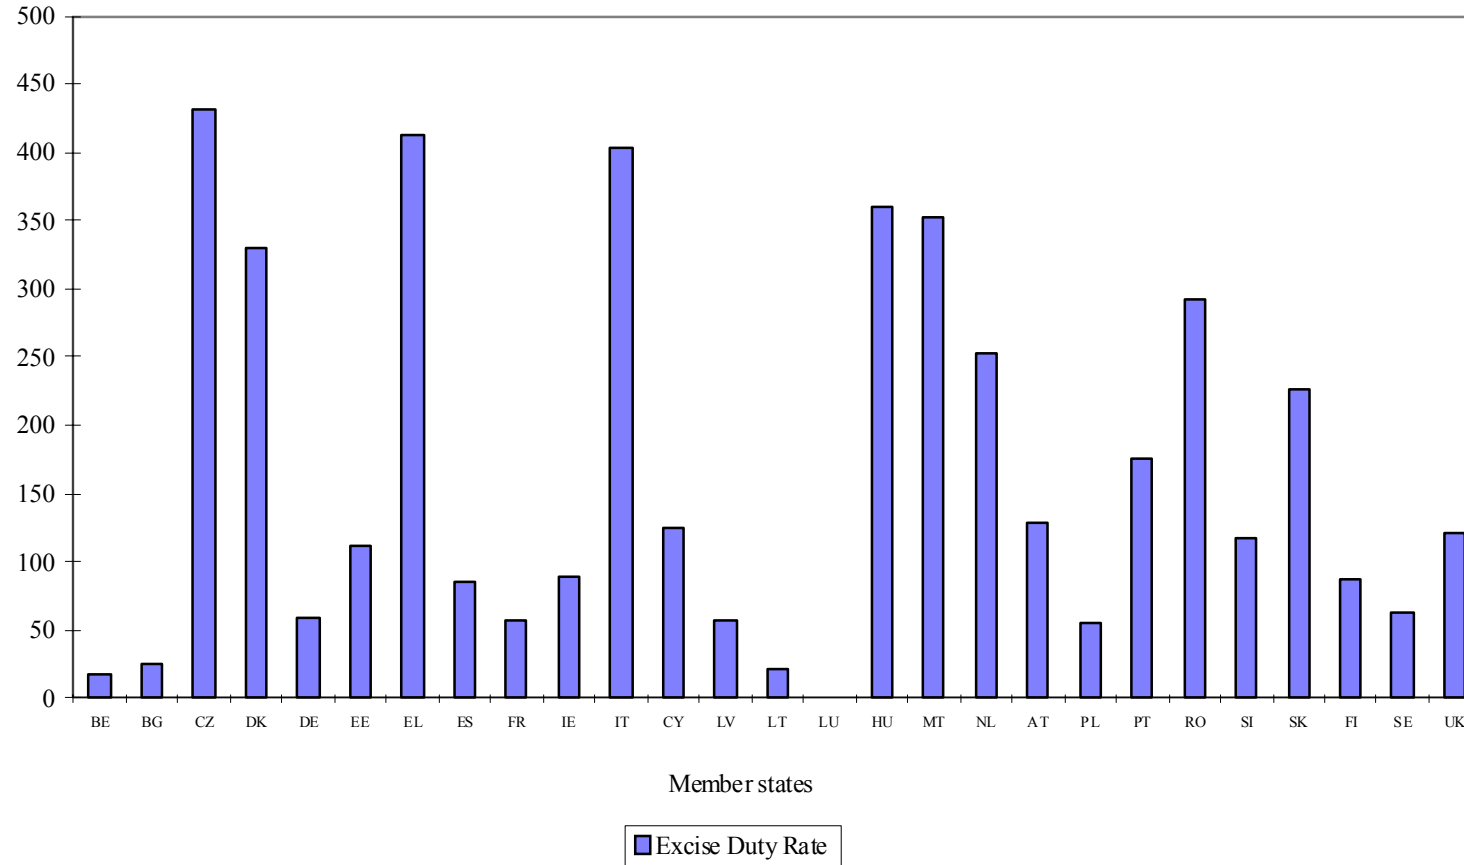

Minimum excise duty: 330 EUR per 1000 litres

Gas Oil

(heating "business use")

Situation as at 1 July 2010

values in EUR at 1/10/2009

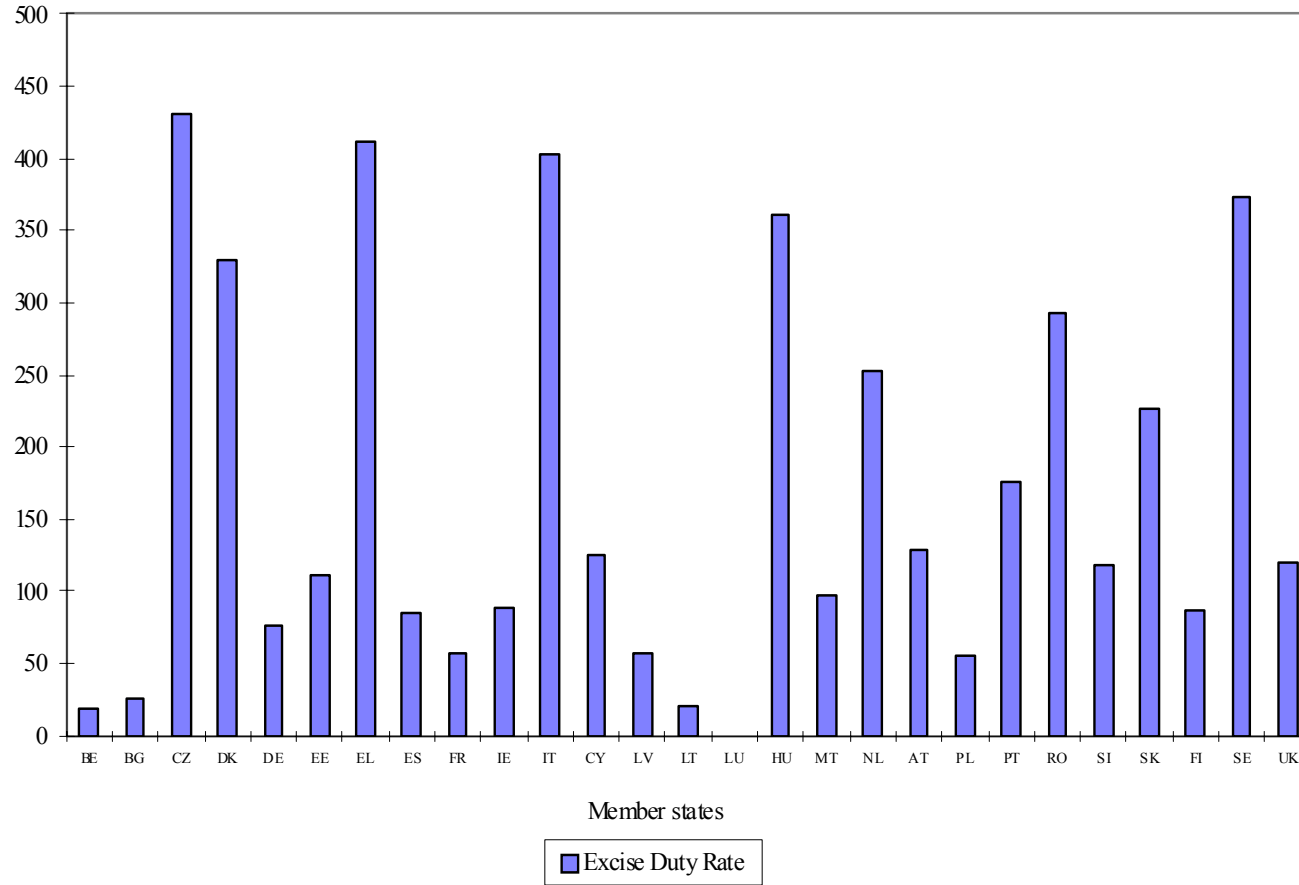

Minimum excise duty: 21 EUR per 1000 litres

Gas Oil

(heating "non-business use")

Situation as at 1 July 2010

values in EUR at 1/10/2009

Minimum excise duty: 21 EUR per 1000 litres

MT: ^(a)Air navigation between Malta and Gozo / for testing and maintenance of aircraft engines.

^(p)When supplied to private pleasure aircraft for use on outbound voyages.

MT: *See Council Directive 2004/74/EC.

NL: * Sulphur content (mg/kg)

NL: For aviation (inland flights only) an excise duty is applicable of € 220,45.

PL: * CN 2710 1921 total exemption from excise

PT: VAT rates valid as of 1st July 2010.

RO: * The Kerosene used as fuel by natural persons is not subject to excise duty. The regime is applying from 1st of January 2004. (Directive 2003/96/EC – Art. 9(1)).

RO: VAT rate valid as of 1st July 2010.

FI: Includes CO₂-tax and strategic stockpile fee.

VAT rate valid as of 1st July 2010.

SE: Includes CO₂-tax.

SE: *Kerosene used in stationary motors by industry in the manufacturing process. A general, higher, tax rate of SEK 3804,00 (EUR 373,34) per m³ applies to kerosene used in stationary motors used by other commercial enterprises as well as to kerosene used for other purposes listed in Article 8.2.

SE: **For taxation of kerosene for heating purposes in the manufacturing process in industry outside the Emission Trading Scheme as well as agriculture, horticulture, pisciculture, forestry. For the manufacturing process in industry within the Emission Trading Scheme, the tax rate amount to SEK 451,95 (EUR 44,36) per m³. Kerosene used for heating purposes by other consumers in the business sector amount to the same rate as apply to non-business use.

UK: VAT rate of 17,50% - non domestic use. Domestic use for deliveries of less than 2 300 litres - VAT rate of 5%. No duty is charged on marked kerosene used for heating.

UK: *If industrial /commercial use **relates to tied oils**, the **rate is NIL**; **otherwise** GBP 109,90 (EUR 120,65) for **off-road motor fuel/engine use**.

as from 1.1.2015 to 31.12.2017 - 19 CZK/GJ (EUR 0,754)

as from 1.1.2018 to 31.12.2019 - 38 CZK/GJ (EUR 1,495)

as from 1.1.2020 - 73,56 CZK/GJ (EUR 2,894)

DK: Includes CO2 tax.

DE: The rates for natural gas in MWh are (1 MWh = 3,6 GJ): propellant and industrial/commercial use EUR 13,90; heating business use EUR 3,30; heating non-business use EUR 5,50.

EL: Exemption from excise tax since the share of natural gas in the total energy consumption was lower than 15% in 2000 (Article 15(1)(g) of Directive 2003/96/EC).

VAT rate valid as of 1st July 2010.

ES: Zero rate for natural gas and biogas used in stationary motors.

ES: VAT rate valid as of 1st July 2010.

FR: In 2009, reduced rate when used for agriculture purpose from January 1st to December 31. refund of 1,071 €/mwh. (article 15.3 of Directive 2003/96/EC)

FR: An exemption from excise duty applies to natural gas when used for the production of electricity, in mineralogical and metallurgical processes and for chemical reduction.

IE: Natural Gas Carbon Tax was introduced on 1st May 2010.

* not used as a propellant in Ireland.

IT * see article 15(1)(i) of Directive 2003/96/EC; this rate is approximate because the national tax rate is based on m³: EUR 0,00291 per m3
 ** this rate is approximate because the national tax rate is based on m³:EUR 11,73 per 1000 m3; this rate is calculated on the base of a calorific power of the natural gas as 36 gigajoule x 1000 standard m³
 *** this rate is approximate because the national tax rate is based on m³
 As of 1st January 2008 the rates are :
 for annual consumptions until 120 m³ : EUR 0,044 per m³
 for annual consumptions higher than 120 m³ and until 480 m³ : EUR 0,175 per m3
 for annual consumptions higher than 480 m³ and until 1560 m³ : EUR 0,170 per m3
 for annual consumptions higher than 1560 m³ : EUR 0,186 per m3.
 LV: * Value added tax for natural gas supplied for households is 10%. In force from 1st July 2010. The national rate is 70 LVL or EUR 98,83 for natural gas per 1 000 m³ used as propellant and 15,6 LVL or EUR 22,02 for natural gas per 1 000 m³ used for another purposes.
 ** Natural gas used in specific manufacturing sectors: 0 EUR per 1000 m³.
 LT: * The national tax rate is LTL 758 or EUR 219,53 for natural gas per 1000 m³ used as propellant.
 **See article 15(1)(g) of Council Directive 2003/96/EC .
 LU: *Article 18(1) of Council Directive 2003/96/EC.
 ** Natural gas used in combined heat and power plants : 0,00 EUR.
 **An energy intensive business with an environmental objectives agreement, consumption > 4.100 MWh or for metallurgical or mineralogical process : 0,01 EUR.
 **A business with an environmental objectives engagement, consumption > 4.100 MWh : 0,08 EUR.
 HU: Natural gas used by households is exempted, see Article 15(1)(h) of Council Directive 2003/96/EC.
 MT: *Product not used in Malta.
 NL: *See Council Directive 2003/96/EC, for propellant use, natural gas used in installations for the production of CNG (compressed natural gas) is taxed at a generic rate of € 0,0310 per m³.
 The rates in the table are expressed per gigajoule.

AT: *See Council Directive 2003/96/EC. The tax rate of National Gas Tax (tax on the supply and consumption of natural gas) is based on volume (0,066 EUR per nm³).

PL: *See Council Directive 2003/96/EC .

PT: Exemption from excise tax since the share of natural gas in the total energy consumption was lower than 15% in 2000 (Article 15(1)(g) of Directive 2003/96/EC).

PT: VAT rate valid as of 1st July 2010.

RO: * The natural gas used by households and/or charitable organizations is exempted from the payment of excise duties. The regime is applying from 1st of January 2007. (Directive 2003/96/EC – Art. 15(1)(h))

RO: VAT rate valid as of 1st July 2010.

*SI: See Council Directive 2004/74/EC Article 18a (10)

SI Presented total amount includes CO₂-tax in the amount of 0, 0238 € per m3 (0,6985 € per GJ).

FI: VAT rate valid as of 1st July 2010.

SK: *The national rate is set on 13,27 EUR per MWh.

** The national rate is set on 1,32 EUR per MWh.

FI: Includes CO₂-tax and strategic stockpile fee.

FI: *See Council Directive 2003/96/EC.

FI: VAT rate valid as of 1st July 2010.

SE: *Natural gas used in stationary motors by industry in the manufacturing process. A general, higher, tax rate of SEK 62,80 (EUR 6,16) per gigajoule applies to natural gas used in stationary motors used by other commercial enterprises as well as to natural gas used for other purposes listed in Article 8.2.

SE: **For taxation of natural gas for heating purposes in the manufacturing process in industry outside the Emission Trading Scheme as well as agriculture, horticulture, pisciculture, forestry. For the manufacturing process in industry within the Emission Trading Scheme, the tax rate amount to SEK 8,46 (EUR 0,83) per gigajoule. LPG used for heating purposes by other consumers in the business sector amount to the same rate as apply to non-business use.

SE: The national tax rates are based on volume.

UK: Natural gases are chargeable only when for use in road vehicles (22,16 pence per kilo – EUR 0,24). For off-road motor/engine use the rate is NIL.

For domestic heating and deliveries less than 2300 litres - VAT rate of 5%.

UK: *See Council Directive 2003/96/EC.

BE: Electricity business use : a federal contribution of EUR 4,0685 per MWh is collected.

BE: *See Articles 4.2 and 5 of Council Directive 2003/96/EC.

BE: (1) delivered to a final consumer connected to a transport or distributor network with a nominal tension of more than 1 kV: 0 EUR

Delivered to a final consumer connected to a transport or distributor network with a nominal tension of 1 kV or less than 1 kV: 1,9088 EUR

° (articles 11 and 17 of Directive 2003/96/EC) an energy-intensive business with an environmental objectives agreement or arrangement: 0 EUR

° (articles 11 and 17 of Directive 2003/96/EC) a business with an environmental objectives agreement or arrangement: 0,9544 EUR

BG: *Zero rate for electricity, used by households - article 15 (1-h) of Council Directive 2003/96/EC.

DK: Includes CO₂ tax.

EL: *The excise duty on electricity is applied from 2 May 2010.

VAT rate valid as of 1st July 2010.

ES: Electricity tax has a general ad-valorem rate of the 5,113% base of VAT, except for cases in which this leads to a lower tax, in which minima apply. These minima are of 0,5 or 1,00, depending on its use (business/non business). Art. 10 of Council Dir. 2003/96/EC).

ES: VAT rate valid as of 1st July 2010.

FR: *See Council Directive 2003/96/EC.

CY: *See Council Directive 2003/96/EC, Art. 4(2).

Electricity irrespective of whether is used for business or not is charged with EUR 2,2 per MWh. The income from this levy is used for providing incentives for the use of renewable sources of energy.

LT: Exemption is applied for electricity used by households and charitable organizations. See article 15(1)(h) of Directive 2003/96/EC.

LT: Exemption is applied for electricity generated using renewable energy sources. See article 15(1)(b) of Directive 2003/96/EC.

LU: **metallurgical processes, electrolyse and chemical reduction or mineralogical process.
